Annual Notice Regarding Our Handling of Your Lab Tests Please Read Carefully

This physician office and TCHHN (The Christ Hospital Health Network) Clinical Laboratory are affiliated. As part of this affiliation, TCHHN Clinical Laboratory serves as the primary provider of laboratory testing services for this physician office.

Your insurance company will receive two separate bills: one for the laboratory testing services provided, and one for the physician office visit itself. Office and lab intake staff will make every effort to determine whether your insurance carrier recognizes TCHHN Clinical Lab as an in-network provider. If your insurance plan does not recognize TCHHN Clinical Lab as an in-network provider, you will be provided with a list of other laboratory testing providers.

It is the patient's responsibility to know which laboratories are covered by their insurance provider and when a higher than normal out of pocket expense might be expected. If TCHHN Clinical Lab performs testing but is not recognized by the patient's insurance plan as an in-network provider, the patient is responsible for paying any charges for laboratory services performed by TCHHN Clinical Lab.

Thank you.

I have read and understand this memo and have had my questions answered.
