

Early Detection = Better Outcomes

High-Risk Cancer Screening Benefits

Relative 5-year survival rates for localized cancers vs. survival rates for late-stage distant/metastatic cancers.

	Early-Stage Cancer	Late-Stage Cancer
Prostate Cancer	~100%	~34%
Breast Cancer	~99%	~32%
Ovarian Cancer	~94%	~20%
Colorectal Cancer	~90%	~14%
Pancreatic Cancer	~45%	~3%

Early Detections result in Better Outcomes

The Christ Hospital High-Risk Cancer Screening Clinic can help by:

- Being your advocate and partner in evaluating your risk to develop certain cancers.
- Making recommendations and referrals for more advanced and frequent imaging and testing.
- Creating a personalized action plan to address your cancer risk.

In addition to family history, the following factors can impact cancer risk:

- Testing positive for a mutation in a gene that increases cancer risk.
- Ages of menarche and menopause.
- Tobacco use, excessive alcohol use, obesity, unhealthy diet, and other environmental exposures.
