The Christ Hospital Health Network

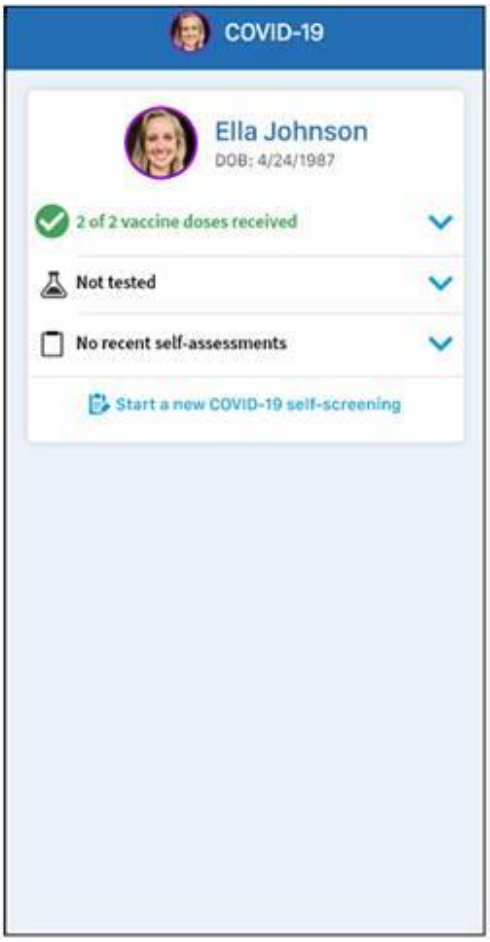
Tip Sheet

Adding Your COVID-19 Vaccination Info into MyChart

You are now able to submit your COVID Vaccine Information through MyChart in a few different ways.

Try It Out

1. You can check state and local registries, like the Ohio Department of Health, that we have synced with MyChart for vaccinations that were not received at The Christ Hospital Health Network. This will allow you to automatically verify your vaccination information if all the information below is present:
   a) Your vaccination has a status of received, along with a valid administration date and lot number.
   b) The identifying information matches your information in MyChart, including name, date of birth, sex, and address or phone number.



@2020 Epic Systems Corporation. Confidential.

2. If you check these registries and your vaccine information is available BUT cannot be verified, you can confirm or discard it. This happens when not all the information noted above has been received.

3. If your vaccine information is NOT available after you check the state and local registries, you can manually update it through a questionnaire and submit it for review.
