### Procedure Orders:

**WEIGHT (kg):** ____________________________ **ALLERGIES:**

- General/MAC/Regional Anesthesia
- Pre Admission Testing/Same Day Surgery RN to check if below criteria is met
  - ECG required - within 6 months of surgery if:
    - Diagnosis of: CAD, arrhythmia, CHEF, CRF, arterial vascular disease, pulmonary disease (except asthma), or DM
  - PT/INR day of surgery required – if no documented INR of 1.1 or less within 48 hours of surgery if on Warfarin in the last 30 days
  - POCT Glucose day of surgery required – if diabetic, if blood glucose is less than 71 mg/dL (or less than 100mg/dL and symptomatic) or if greater than or equal to 180 mg/dL, initiate Preop Diabetes/Glycemic Control Order Set and Notify Anesthesia
  - Potassium day of surgery required – if:
    - 1) On dialysis or
    - 2) Diagnosis of renal failure (not renal insufficiency or working transplant)
  - Urine pregnancy (Beta HCG if unable to void) on day of surgery, unless patient has negative serum pregnancy test within 7 days of surgery – required if female with no history of hysterectomy and:
    - 1) 11-55 years
    - 2) Less than 11 years and has begun menses or
    - 3) Greater than 55 years and less than one year post-menopausal

#### IV: Insert Peripheral IV day of surgery (and saline lock if needed per anesthesia)
- Normal Saline @ 125 ml/hr (1000 ml bag) unless diagnosed with CRF then @ 50 ml/hr
- Other IV

#### Local Anesthesia

- Pre-operative consultation to evaluate for risk factors prior to surgery
  - per PCP, may use hospitalists if not available
  - per hospitalist
  - per surgeon: date _______________________

- Request for anesthesia to provide postoperative advanced pain management

### Nursing:

- Void on call to OR
- Enhanced Recovery
- 2% Chlorhexidine Gluconate wash cloths to be used to operative site upon arrival

#### Labs:

- CBC
- Type & Screen
- Basic Metabolic Panel (EP1)
- PT/INR
- PTT
- Hemoglobin A1C
- LDH
- Liver Profile
- Amylase
- Lipase
- Urinalysis with reflex microscopic
- Nicotine (cotinine), urine
- COVID19
- Other

#### Diagnostic Studies:

- Chest X-ray PA & Lateral
- Other

#### Reason:

- ECG

#### VTE Mechanical Prophylaxis:

- Place SCD prior to induction of anesthesia
- Knee
- Thigh
- Right
- Left
- Bilateral
- NO SCD needed-must give reason
- Already anticoagulated
- Ambulating
- Refused
- Fall risk
- Not indicated-low clinical risk

#### VTE Pharmacologic Prophylaxis:

- Heparin 5,000 units, subcutaneous, preop once
- NO pharmacologic VTE-must give reason
- Already anticoagulated
- Bleeding risk
- Active bleeding
- Refused
- Thrombocytopenia
- Not indicated-low clinical risk

#### No preop antibiotics needed

### Pre-Operative Antibiotics: *Required*

#### Colorectal procedures* or other
- Cefazolin 2g IVPB x1 if patient greater than or equal to 120kg Cefazolin 3g IVPB x1
  - **plus** Metronidazole 500mg IVPB
  - **Alternate if allergy** give Levofloxacin 750mg IVPB x1 plus Metronidazole 500mg IVPB x1

#### Percutaneous G-tube* or other
- Cefazolin 2g IVPB x1 if patient greater than or equal to 120kg Cefazolin 3g IVPB x1
  - **Alternate if allergy** give Levofloxacin 750mg IVPB plus Clindamycin 900mg IVPB

#### Other antimicrobial coverage
- Cefazolin 2g IVPB x1 if patient greater than or equal to 120kg Cefazolin 3g IVPB x1
- Vancomycin 15mg/kg (not to exceed 2000mg) IVPB x1 – **For peritoneal dialysis catheter placement or allergic to cefazolin AND clindamycin**

#### Other

- Gabapentin 300 mg x1 Oral 1-2 hours before surgery
- Alvimopan 12 mg x1 Oral 1-2 hours before surgery
- Oxydomet TR tablet 10 mg Oral 1-2 hours before surgery

- Physician Signature ____________________________ **Date:** ____________________________ **Time:** ____________________________
