Orthopedic Pre Surgery Orders 2124 (MAJOR)	
R 3592 A Rev. 3/2022 Page 1 of 1	Patient Name:
To be performed within 30 days, unless otherwise noted.	Patient Name: Date of Birth:
Fax to (513) 585-0169	Duce of Difful.
(=)	Surgery Confirmation #
Surgeon name:	v
Phone: Fax:	
Procedure Orders:	
WEIGHT (kg): ALLERGIES:	
General/MAC/Regional Anesthesia Pre Admission Testing/Same Day Surgery RN to check if below criteria is met ECG required - within 6 months of surgery if:	
Diagnosis of: CAD, arrhythmia, CHF, CRF, arterial vascular disea	ase, pulmonary disease (except asthma), or DM
<b>PT/INR</b> day of surgery <b>required</b> – <b>if</b> no documented INR of 1.1 or 1	ess within 48 hours of surgery if on Warfarin in the last 30 days
POCT Glucose day of surgery required – if diabetic, if blood glucose is less than 71 mg/dL (or less than 100mg/dL and symptomatic) or if greater	
than or equal to 180 mg/dL, initiate Preop Diabetes/Glycemic Control Order Set and Notify Anesthesia  Potassium day of surgery required – if: 1) On dialysis or 2) Diagnosis of renal failure (not renal insufficiency or working transplant)	
Urine pregnancy (Beta HCG if unable to void) on day of surgery, unless patient has negative serum pregnancy test within 7 days of surgery –	
required if female with no history of hysterectomy and:	
1) 11-55 years 2) Less than 11 years and has begun menses or 3) Greater than 55 years and less than one year post-menopausal IV: Insert Peripheral IV day of surgery (and saline lock if needed per anesthesia)	
Normal Saline @ 125 ml/hr (1000 ml bag) unless diagnosed with	
☐ Other IV	
☐ Local Anesthesia	
Pre-operative consultation to evaluate for risk factors prior to surger	
□ per PCP, may use hospitalists if not available □ per hospit	
☐ Request for anesthesia to provide postoperative advanced pain management.	gement. <b>Z</b> PT evaluate & treat pre op joint replacement prior to day of surgery
Nursing:	☑ Stockings:
Celecoxib (Celebrex) does not need to be stopped prior to surgery. Al	
other NSAIDs should be stopped 7 days before  ☑ Durable Medical Equipment: Walker (5" fixed front wheels)	TED with patient to OR Please choose: ☐ Knee ☐ Thigh ☐ Place Carolon Stocking Please choose one: ☐ place one on non-op
✓ 2% Chlorhexidine Gluconate Wash cloths to be used to operative site	leg and send one to OR or $\square$ Send 1 stocking to OR
upon arrival	☐ Have cast split (bivalved)
☐ Shoulder Arthroplasty Study – Assess and Document Pain Score	☐ Send any immobilizers, boots, splints, braces, slings, or cold therapy
☐ Void on call to OR☐ Place foot pump prior to induction of anesthesia	units with the patient to the OR  ☐ Leave splint with ACE wrap intact on patient
	Testing/Same Day Surgery RN to follow up based on below criteria
	ilture to rule out Staph Aureus as STAT, place order for Mupirocin (Bactroban)
2%, preop once, and apply to both nostrils.	•
If nasal PCR/culture not final prior to OR, order Mupirocin (Bactro	ban) 2%, preop once, and apply to both nostrils.
If nasal PCR/culture obtained preoperatively, and results were positive for Staph Aureus, record start date for Mupirocin (Bactroban) in the PTA meds. If Mupirocin (Bactroban) has not been started, order Mupirocin (Bactroban) 2%, preop once, and apply to both nostrils.	
	antimicrobial selection, and order Vancomycin 15mg/kg (max 2000mg) x1.
Labs:   Nasal PCR or nasal culture (if on nasal steroid) for Staph aureu	· · · · · · · · · · · · · · · · · · ·
☐ CBC ☐ Basic Metabolic Panel (EP1) ☐ PT/INR ☐ PTT ☐	Type & Screen  Urinalysis with reflex microscopic
☐ Urine Culture ☐ HgbA1c ☑ HgbA1c for diabetic total joint patients	if not within last 30 days
Diagnostic Studies:   Chest X-ray PA & Lateral (within 6 months)	
Other: Reason:	□ ECG Reason:
VTE Mechanical Prophylaxis: (MUST CHOOSE ONE)	
☐ Place SCD prior to induction of anesthesia ☐ Knee ☐ Thigh ☐ ☐ NO SCD needed-must give reason ☐ Already Anticognilated ☐	Foot
VTE Pharmacological Prophylaxis:	Amounting — I attent refused — I all fish — Not indicated flow chillical fish
☐ Heparin 5,000 units, subcutaneous, preop once	
□ No pharmacologic VTE-must give reason □ Already Anticoagulated □ Bleeding risk □ Active bleeding □ Patient Refused	
☐ Thrombocytopenia ☐ Not-indicated-low clinical risk	
Meds: ☐ No preop antibiotics needed	
Pre-Operative Antibiotics: *Required- *Arthrodesis, *Arthroplasty, *Long bone procedures, *ORIF, * Spine, or other (CHOOSE ONLY ONE)  Cefazolin 2 g IVPB x1; if patient greater than or equal to 120 kg Cefazolin 3 g IVPB x1; Alternate if allergy give Clindamycin 900 mg IVPB x1	
☐ History of MRSA infection Vancomycin 15mg/kg IVPB x1 Maximum dose of 2000 mg	
☐ Tranexamic acid 1 gm IVPB Please choose: ☐ pre-op once ☐ int	-
☐ Tranexamic acid 1 gm in sodium chloride 0.9%-total volume 50 ml, Ir	
☐ Oxycodone SR (Oxycontin)	
- For patients 70 years of age or greater: give 10 mg by mouth pre-op	- For patients less than 70 years of age: give 20 mg by mouth pre-op
